1953 INTRODUCTIONS

ARABI PASHA (Gwendolyn Anley, England). Midseason, 36 inches. (Minerette: Blue Ensign x Windermere) x (Blue Ensign.) Rich, deep, cornflower blue with blue beard. This iris has created quite a stir in England, receiving high praise from all quarters. We are proud to offer it to the iris world and congratulate Mrs. Anley on a lovely creation. The tailored flower is smoothly finished. The falls flare and have a graceful dip, giving it a special charm and personality among the blues. Arabi Pasha will be well received by fanciers who appreciate quality. The Blue beard will be welcomed by those desiring to put this into the blues and white. Selected for trial at Wisley in 1951. Runner-up for the Dykes Medal in England in 1952\$20.00

A. Z. WELLS (Mrs. Walter Noyd, Washington). Early-Midseason, 32-36 inches. (Ormohr x Indian Hills.) For those who like the Mohr family and those who have wanted a larger Indian Hills. A. Z. Wells is "it". A very large, rich purple flower that will command attention in any planting. Best described, of course, as a gigantic Indian Hills. Moderately branched. Fertile pod parent.....\$15.00

BLUE DRAPES (Mary Tharp, Idaho). Midseason, 38 inches. (Amigo x (Lord of June x Esplendido) x (Persia.)) A large, tall, well branched, stately neglecta of commanding color and quality. Mrs. Tharp in her quiet way has produced many lovely iris, this is among the very best, yet she has been too modest to push any of her "children". We like this, and believe other discriminating fanciers will, too. It is much larger than its fine parent, Amigo. A difficult parent, so it may have an upset number of chromosomes, but if it can be induced to set seeds should give us some new and vigorous blood for Neglectas and Amoeans. Deep blue standards, rich pansy-purple falls.....\$10.00

BLUE FAIRY (Muhlestein). Midseason. (Cool Lemonade x Hoogie Boy.) Delightfully ruffled, medium-sized, flaring, blue self on 36-inch wiry stems having two branches, ordinarily. Mentioned by H. Senior Fothergill in 1952 British Iris Society Year Book on page 113 as No. 1 Blue. No pollen, will set seeds. Tremendous of increase\$5.00

FLAMINGO BAY (Muhlestein). Midseason, 40 inches. (Cherie x Pink Formal.) Here is a tall, well branched salmon-pink with good color for garden as well as lovely, wide, individual flowers. With such breeding it should make a superb parent. No. 51-25.....\$15.00

CANADAWAY (L. W. Cousins). Midseason. 40 inches. (Long line of White seedlings.) We are proud to offer Mr. Cousins' first iris since Great Lakes. Referred to several times in the bulletins this very large, wide white with its yellow beard and light yellow lines at the haft may not be the whitest white, but is surely a standout for ruffling, substance and quality. I can visualize its great breeding possibilities, and have seen some slides of its very white offspring giving an assurance of its remarkable breeding ability. Vigorous plants, heavy, well-branched stalks. Highly Commended 1952\$20.00

GLISTENING COPPER (Muhlestein). Midseason-Late, 32 inches. (Sister to Utah Sunset.) The name describes this color. As smooth as its sister but in a deeper almost self rosy-copper color. A medium-sized flower. It is proving a sensational parent for rich coppers, browns, reds and blends, and eliminates any haft markings. No. 48-72. H. C. 1951.....\$15.00

GREEN IVORY (Muhlestein). Midseason-Late. (Desert Song x sister to Greenglow.) Huge greenish-ivory self of very wide proportions. Falls somewhat down-hanging, but full and held out. Branching is low but close—one stalk making a full bouquet. We think it will be most effective in the garden, as a show specimen, and will surely be a good parent with such things as Char-Maize, Greenglow, Mint Julep and the greens from the dwarfs to give us better iris in the much-wanted green color. No. 51-42.....\$15.00

HAPPY TALK (Mary Ollman, Berwyn, Ill.). Midseason-Late, 36 inches. (Elsa Sass x Coritica.) Happy Talk has the deepest yellow ground color of any plicata I have seen, and is nicely marked with rosy-red etching on the standards and falls. Might be described as a more yellow Firecracker. A large, flaring flower just a trifle narrow at hafts for its size, but a grand yellow plicata nevertheless.....\$15.00

HELLEBORE (Carl Taylor). Midseason. (Gentle Florence x Tobacco Road.) A rich, smooth, Hellebore-red (brown-toned red) with that perfection of form both Snow Flurry and Tobacco Road pass on to their descendants. Wide, full, ruffled flowers 5 x 5 inches carried on well branched 38 inch stalks. Such a rich red was hardly expected from this cross and I am most pleased with it, as is Mr. Taylor, for the blood of Snow Flurry will do much in the lines of fine reds already here and on the iris horizon\$20.00

1953 INTRODUCTIONS

HONOR GUEST (Doziner). Midseason. (Amigo x Wabash.) A near amoena with exceptionally good growing habits. A fine, floriferous bloomer and one Dr. Dozier was particularly fond of. Introduced for the hybridizer and those who want an easy grower in this color-range\$5.00

MEXIGLOW (L. Crosby). Midseason, 34 inches. (Mexico x Mellowglow.) A rich, large, flaring golden-brown blend with a flush of blue-violet in falls, with a lighter tan area around the beard. Certificate of Commendation, 1952, Highly Commended 1951, and winner of the Seedling Cup at the Utah Iris Society Show 1952\$20.00

MINT JULEP (Hazel Recknor, Iowa). Midseason. (Probably Grand Canyon x ?.) Another iris in the color-range of Char-Maize. A large, full flower that is devoid of any other colorings. Introduced for a breeding iris for those interested in this elusive "green" coloration. Well branched, 36 inch stalks.....\$10.00

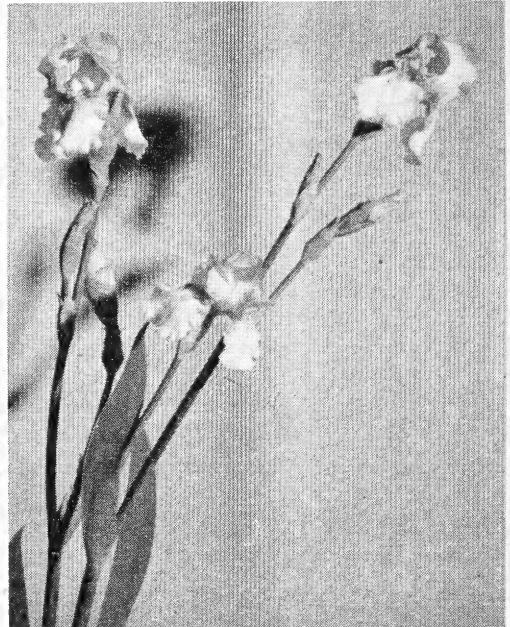

MOHR AND MORE (Muhlestein). Midseason, 40 inches. (Aldura x Capitola.) Large, wide, rich purple self with flaring full Mohr-form. This iris has a strong tendency to produce flowers with 4 standards and 4 falls, hence the name. Superb, strong substance and heavy stalks. Highly commended 1952 under No. 48-91A.\$20.00

ORANGE CREAMO (Muhlestein). Midseason, 40 inches. (Salmon Shell x Pink Formal) x (Apricot Glory.) A luscious orange-apricot on tall, well branched stalks. The wide flowers are full and clean. With these by-products of the shell pinks we have arrived at the true orange color. Orange Creamo is so fast of increase that it is possible to introduce only two years after it was selected from a first year plant. We think the blood superb for this color, pinks and the new rose-orchid shades. Highly Commended 1952 under No. 51-53C.....\$15.00

PEARLIMOHR (Wilma Vallette, Idaho). Early-Midseason, 36 inches. (Gudrun x Capitola.) Here is an unusual pearl-gray with the Mohr-type fullness seen in most of Capitola's seedlings. The first introduction from this keen judge and hybridizer whose interest is strong for these hybrid-lines. Certificate of Commendation 1952\$10.00

PINK CONFECTION (Muhlestein). Midseason-Late, 40 inches. (Hall's 44-09, sister to Hit Parade x Pink Formal.) This is a very large, wide somewhat ruffled light baby-ribbon pink. The falls are considerably lighter than the standards. The style arms are full and ruffled. Pink Confection will surprise those who have been skeptical about true pink coloring in iris. While not deep it is very pink. The strong, well branched stalks are in balance with the large globular flowers. No. 49-31-50.....\$15.00

RASPBERRY ICE CREAM (Muhlestein). Midseason-Late, 36 inches. (46-24C : SQ 72 x 44-67, a sister to Gold Ruffles) x (Pink Formal.) A deep pink that seems to have a raspberry-lavender cast in the color which makes it much pinker than the salmon-toned pinks. It has been such a fine breeder to deepen the pink color, and garden visitors have wanted it over the years so I have decided to introduce it for its good breeding qualities and its garden value. Falls are down-hanging, wide and full and a shade or two darker than the standards, although it is practically a self. No. 48-39.....\$10.00

RUFFLED ORGANDY

RUFFLED ORGANDY (E. Brenck, Calif.). Early-Midseason-Late. (Gilt Edge) x (Snow Flurry x Nylon.) Here is an iris for close-up enjoyment. The full, ruffled translucent flowers defy description. The creamy ground is smooth and clean. Both standards and falls are bordered with buff. There are glints of violet comparable to the pearl-tints found in many beautiful sea shells. The tall, strong, superbly branched stalks hold from 10 to 17 buds. Ruffled Organdy will start to bloom with the first of the Tall Bearded and continue on through the end of the season. Visions of its lovely seedlings in many colors come to our mind's eye. With such blood it cannot miss as a good breeder. Little pollen; however, it is fertile both ways. Certificate of Commendation and Highly Commended in 1952. Lyon Iris Gardens, of Van Nuys, Calif., are co-introducing with us, we are happy to say, and we suggest those living in mild climates obtain their stocks of Ruffled Organdy from the Lyon gardens.....\$20.00

SALMON SHEEN (Mrs. Glen Suiter, Idaho). Early-Midseason. (Pink Salmon x Pink Formal.) The same cross as Mrs. Corey's Anthea. A salmon-pink for the front of the border—just 32 inches. Here is a very colorful, clean, flaring, beautifully shaped, tailored flower. Selected by Suiter and her many garden visitors as worthy of introduction, so we are proud to offer it. We like the bloodlines for deep pink breeding. **..\$10.00**

SPIC AND SPAN (M. D. Wallace, Utah). Midseason-Late. (Kalinga x Golden Madonna) x (Fort Knox x Golden Majesty.) Tall, well branched 40 inch stalks show to advantage this lovely wide cream. A superb show specimen, it has been greatly admired for two seasons here in Utah both in the Wallace garden and at the shows. It has great breeding possibilities for creams, yellows, white, possibly pinks and blends. Winning both a Certificate of Commendation and Highly Commended Awards in 1952 it is destined to be well received and popular. **.....\$15.00**

STORMY SKIES (Gordon Plough, Wash.). Midseason, 38 inches. (Arctic x Tobacco Road.) Here is the most unusual smoky-buff blend we have ever seen. The wide flowers are large, the standards beautifully domed, and the slightly ruffled falls flare widely. There is a gay flush of violet below the big, conspicuous rich yellow beard. If you like quality and the unusual that you can mistake for no other you will like Stormy Skies. Highly Commended 1952 **.....\$20.00**

STORY PRINCESS (L. Crosby). Midseason, 40 inches. (Snow Flurry x Cloud Castle.) So many fine things have been produced from this superb cross that hardly a cull could be found in the large number of seedlings Mr. Crosby had from it. Shown in open competition in the violet class at Salt Lake last spring it was awarded a second place ribbon, and was much admired as a cut flower under artificial light. It is a light violet—a few shades darker than Helen Fitzgerald and has a white-tipped beard. A splendid grower that can be depended upon to bloom year after year. **..\$10.00**

VALGANZA (E. Brennan, Calif.). Early-Midseason, 38 inches. (Extravaganza x Val.) Here is a truly magnificent and brilliant new variegata. The standards are yellow and the falls are a rich Malvasia-grape color (red-purple). There are a few lines at the hafts, as in most variegatas. The closest iris in color to Valganza is Pretender. Both are distinct and striking. An easy grower—the little *Oncocyclus* blood, too, makes this quite unusual. It should be a fine parent for Variegatas and Amoenas. **..\$20.00**

WEATHER BIRD (Muhlestein). Early-Midseason, 36 inches. (Cool Lemonade x Aldura.) A huge, full, globular plicata with a cream ground. Standards are flushed lavender whereas the falls are neatly bordered lavender. Wide of parts and excellent substance we think this will be a fine parent for plicatas and lemon-yellows. Introduced primarily for breeding and those who want full, wide flowers. **.....\$5.00**

KEY TO UNDERSTANDING THIS CATALOG

In listing the parents the Pod parent is listed first followed by an "x" indicating the flower was crossed with pollen of the next parent indicated. Complicated parentages are found in two or more brackets.

E., M., L.: Season of bloom; Early, Midseason, Late.

Varieties marked with "*" are descended from Regelia or *Oncocyclus* iris.

Hybrid: Cross of two distinct species.

C.O.C.: Certificate of Commendation—given by judges at A.I.S. shows.

H.C.: Highly Commended Award given by A.I.S. judges to iris (growing in gardens) not yet introduced.

H.M.: Honorable Mention. The first "counting" award an iris may receive on its climb to higher awards.

A.M.: Award of Merit may be given to only eight Tall Bearded and two "other than Tall Bearded" each year by A.I.S. judges. One year must elapse after the H.M. award before an A.M. may be won.

DYKES MEDAL. Memorial medal given by the English Iris Society in memory of W. R. Dykes who contributed, in hybridizing and writings, in monumental ways to increase interest in iris. At present the Dykes Memorial Medal is given (or offered) in U.S.A., England and France, although no medals have been awarded in France for several years. This is the highest award any iris may achieve.

AMOENA: Iris having white standards and darker colored falls—usually in shades of lavender or purple, although recently have come some yellow and white amoenas.

NEGLECTA: Bi-colored blue or purple with the standards very much lighter colored than the falls. (This is closely related to Amoena coloring, but the contrast isn't so great.)

PLICATA: Varieties having a distinct "stitching" or bordered edge on either standards or falls, or both, although recently have come varieties often referred to as "fancies" that are dotted, brushed or almost completely covered with color other than the ground color. We have yellow-ground plicatas or white-ground plicatas with markings in blue, purple, brown, red, etc.

BLENDS: Colors containing a lot of yellow blended with any number of other colors, reds, coppers, browns, pinks, lavenders, blues, etc.

VARIEGATAS: Yellow standards (or blended tan or brown) with very dark brown, purple or red falls.

SUBSTANCE: The thickness, heaviness or lasting quality of the petals.

TEXTURE: The finish of the flower, whether velvety, dull, enamel-like, silklike, etc., and this does not have a great deal to do with actual substance, although flowers with heavier substance may appear different in texture—show more depth or velvetiness than varieties with less substance.

- APRICOT GLORY** (Muhlestein '51). M.-L. (46-113; Golden Eagle x Hall's 4024) x (Gay Orchid). Smoothly finished light apricot, or salmon, with deeper hafts and self beard. Apricot Glory proved one of the most exciting new parents last year. Its seedlings range in colors from white with red beards through various shades of pinks, salmons, apricots with orchid undertones, and the real break—pure oranges. It produces much richer, deeper colors than itself with quality blooms and substance. Not quite as deep in color as the picture in this catalog, but a lovely flower nevertheless. H.C. 49, H.M. '51.\$12.00

APRICOT SUPREME (Tompkins '51). M. ((Spring Maid x Far West) x (SQ 73 x Hall 42-05)) x (Pink Salmon). Very tall, well branched apricot-salmon of good size. We think it will be a delightful parent used with Party Dress, Pink Formal, Apricot Glory and Salmon Shell. H.C. '50, H. M. '51.....\$10.00

ARAB CHIEF (Whiting '44). L. (Raejean x Garden Magic.) Burnt copper-orange. Fine, late, garden subject and an excellent parent. H.M. '46.\$1.00

ARABIAN NIGHTS (Whiting '49). M.-L. ((Marisha x Amitola) x (China Maid)) x (Far West x Matula). Blending of bright peach, yellow, pink and rich copper. With this blood it cannot miss as a fine parent with lines involving the Sass, Tomkins and Kleinsorge rich blends....\$2.50

ARABI PASHA (See Introductions)

ARGUS PHEASANT (DeForest '48). M. (Casa Morena x Tobacco Road.) Large, brilliant golden brown. A.M. '50. Dykes Medal '52.\$7.00

ARIA (Tompkins '48). M.-L. (Damascus x Rocket) x (Apex). Coppery toned henna. One of the parents of Manana which in turn is parent of the now famous 50-90. Aria is going to do great things in breeding reds. We recommend it highly for this purpose. Net.....\$1.50

ARIANE (Cayeux '35). M. (Chaldee x Fakir.) Heavily marked, over-all patterned plicata....\$.50

ASKALON* (Jory '49). E.-M. (Grace Mohr sdlg. x Capitola.) Standards lavender, falls deeper with yellow flush. Mohr shape.....\$2.50

AUBURN (Kleinsorge '45). M. (Prince of Orange x 258: Far West x Junaluska.) Auburn-red with metallic flush in falls. Rich blood for blends, oranges and reds. H.M. '46.....\$2.50

AUCOCISCO (Tobie '49). M. (?) Pronounced Auco-cis-co. Lovely wisteria standards, falls deep blue purple—making it a delightful neglecta. 34 inches. Net\$3.00

AUGUSTA (McKee '48). M. (Miobelle) x (Red Gleam x 4158). Rich blend that cannot miss being a splendid parent for reds and blends. H.M. '48. Net\$1.00

AUNT AMORET (Craig '51). M. (Advance Guard x Mitchell 0-50.) Unusual fancy plicata. Violet brushed on white. C. of C. '47.....\$7.50

AURORA DAWN (Whiting '48). M. (Veishea x Korea.) Rose-pink and gold.....\$1.00

AUTUMN FLAME (H. P. Sass '41). M. Rebloomer. (From seedlings from Morning Splendor x King Tut.) Bright purple.....\$1.00

AUTUMN HUES (Henry Sass '51). M. (40-44: ((Ola Kala) x (The Red Douglas x Ossar Seedling)) x (Rainbow Room.) Introduced as Indian Summer. A bigger, more ruffled, Rainbow Room.\$20.00

AUTUMN TWILIGHT (Brown '48). L. & Re-blooms. (?) Ecu standards, falls same with heavy center of lavender. 32 inches. Net.....\$2.00

AZTEC COPPER (Kleinsorge '39). M. (Far West x Tan Sdlg.) Odd, wide, smoky-copper. Superb parent. Useful for many colors. H.M. '40..\$.75

AZTEC INDIAN (W. Buss '49). M. (Brown Thrasher x Gypsy.) Quality bright new variegata \$4.00

AZURE SKIES (Pattison '43). M. (Crystal Beauty x Snowking.) Delightfully ruffled light blue. A fine parent used with tall plants. A.M. '45\$.60

AZURE LAKE (Muhlestein '52). EM (Azure Skies x Mirror Lake.) Smoothly finished blue with falls that flare horizontally and have the most heavy ruffling of any blue iris I know. 36 inches tall, not well branched, but makes a stunning clump. C. of C. and H.C. 1951..\$15.00

A. Z. WELLS (See Introductions)

BAGHDAD (Whiting '46). M.-L. (Garden Glory x Golden Spike.) Yellow with bronze overlay. Highly potent pollen. Should be an excellent breeder for yellows, blends and red.....\$1.50

BALLERINA (D. Hall '51). M. (46-30: 4407 x Cherie) x (Hit Parade). H.M. '51.....\$10.00

BALLET DANCER (Kleinsorge '49). E.-M. (Chamois x Cascade Splendor.) Apricot-tan. Falls flare horizontally. Regal blood!.....\$3.50

BALMUNG (H. P. Sass '39). M. (From yel. plic. breeding, undoubtedly Orloff and Tiffany blood.) Fine wide yellow-ground, brown-sticked, plicata\$.60

BALTIS* (White '48). EM. (Onco-bred.) High tones of purple. H.M. '48.....\$2.50

BANDED BEAUTY (H. Sass '48). M. (48-38: Tiffany x Siegfried) x (33-38: Rameses sdlg. x Orloff.) Brown banded plicata.....\$2.00

BANDMASTER (D. Hall '44). M. (Blue sdlg. x Great Lakes.) Large medium blue. H.M. '44....\$.75

BARBARA ADAMS (Cahoon '47). E.-M. (Purissima x Dymia) x (Brunhilde). Rich blue-purple of delightful form Grand blood for dark purples and blues. Net.....\$2.00

BARIA (P. Cook). E.-E. (True Intermediate.) Distinct new class of intermediates from I. pumila. Yellow, slightly waved petals. H.M. '51. Net\$3.00

BARRIMOHR* (Wm. Miller '44). M. (Wm. Mohr x Adobe.) Large, well formed purple bi-color. Difficult parent\$1.00

BATAAN (Kleinsorge '42). M. (233: ((Purissima x Cameliard) x (??)) x (Aztec Copper). Red, copper and rose blend. Difficult in growth here..\$1.00

BAY STATE (Corey '49). M. (Pale Moonlight x Great Lakes.) Highly praised, smoothly finished flower said to be as blue as anything introduced. H.C. '46, H.M. '49.....\$5.00

- BEAU GAY** (Nesmith '49). M. (Leilani x Prairie Sunset.) Medium-sized rich salmon-orange self. One to use in pink, apricot and orange breeding\$3.00
- BELLE AMIE** (J. Ohl '49). M.-L. (Tiffany x Golden Fleece.) One of those lemon-ice colors. The name: "Beautiful friend." H.M. '50.....\$3.00
- BELLE BRUNETTE** (Mitchell '48). M. (Orloff x Siegfried) x (6-6 x Siegfried). Very colorful new plicata. Fine parent. Net.....\$1.50
- BELLERIVE** (C. Benson '49). E.-M. (Birchbark x Gallant Leader.) Huge, heavy substance cream with Gallant Leader's form. Should be a top breeder for putting size, height and form into the reds. Blood here, too, for creams, whites, purples, blues and blends. H.M. '50\$4.00
- BEN BOLT** (Lothrop). L. (Esquire x 45-30: L8-40 x The Black Douglas.) Mrs. Lothrop's bid for the finest dark iris. Of commanding form, height, lasting quality and all-around excellence. Standards so dark they almost appear velvety. 40 in., well-branched stalk. Net. \$5.00
- BERKELEY BLUE** (Salbach '44). E.-M. (Purissima x blue sdg.) Splendid blue, and another great child of Purissima.....\$1.00
- BERKELEY GOLD** (Salbach '42). M. (Radiant x sdg.: Happy Gift x Natoma.) Clean rich yellow in great demand. A.M. '46.....\$.60
- BIG TIME** (Lapham '51). M. (Red Waves x P. Cook 2044: Redward x Copper Rose.) Very large new red, impressive for size and breeding qualities.....\$15.00
- BILLOWY SEA** (Norton '44). M. (Great Lakes x Shining Waters.) Large blue of deeper color and different form than its sister Sylvia Murray. Should be a superb parent.....\$1.00
- BIRCHBARK** (Kleinsorge '40). E.-M. (Undoubtedly Purissima blood.) Splendid white and a fine parent for whites, blues and creams. Net \$.75
- BIRD SONG** (Corey '52). M. (Sensation x Los Angeles) x (Wambliska x San Francisco). A heavily marked plicata that is striking and dainty because of its jaunty flaring form. We are pleased to list it the year of its introduction. H.M. '52\$7.50
- BLACK AND GOLD** (Kleinsorge '43). M. (Involving: Yakima, Cameliard, Burning Bronze, Purissima, Jean Cayeaux, Crown Prince.) Richly contrasting variegata. Net.....\$1.00
- BLACK BANNER** (Nicholls '47). M.-L. (Smolder x The Black Douglas.) Tall dark purple. H.M. '47\$1.00
- BLACK DIAMOND** (Schreiner '51). M. (Sister to Black Forest x Down East.) Impressive new black-purple because of its lovely form and good size. Sure to be a great breeder. Net\$10.00
- BLACK FOREST** (Schreiner '45). M. (Dymia x Ethiope Queen.) Not large or tall, but very dark—almost black. A.M. '48.....\$1.25
- BLACK HAWK** (Schreiner '41). E.E. (Lutin x Black Wings.) Very dark purple bi-color. A true intermediate. Will start the tall-bearded season. 20 inches\$.75
- BLACK HILLS** (O. Fay '51). M. (Black Valor x Gulf Stream) x (Black Forest). H.M. '51.

- ECHO VALLEY** (Kerr '52). EM. (Ormohr x Wabash.) Hardly expected, this Minnie Colquitt-type plicata has a strong reblooming tendency. 34 inches. Very fertile pollen. H.C. '51...\$10.00
- EDITH RORKE** (K. Smith '46). M. (Valentine x Florentine.) Precisely stitched blue and white plicata. H.C. '45.....\$1.50
- EDWARD OF WINDSOR** (Morris '45). M. (Sdgs. from: Sacramento, Mary Geddes and Golden Hind.) Odd pink break. Useful parent for new blood and vigor.....\$3.00
- ELAN*** (White). E. (Sweet Alibi x Jocund.) One-fourth Onco blood. White.....\$.50

- ELENA CHOOSING*** (White '44). E.-M. (Answer x Jocund.) Buff blend with metallic blue in falls. Proving a splendid parent for blends. Easy parent\$1.50
- ELIGIBLE** (Snyder). M. (Dreamland x Sdlg.) Fine new dark red.\$3.00
- ELIZABETH OF ENGLAND** (Miles '46). M. (Typhoon x Lagoon.) Exquisite light azure blue that holds its color. The parent of Miles' 1952 introduction, Vandabeth. Net.\$5.00
- ELLA CALLIS** (H. P. Sass '42). M. (2-34 x 32-28: Midwest Gem x Prairie Sunset.) Stunning big yellow brushed orange. Falls have an overlay of orange-brown. Protect from strong, full, sun\$1.00
- ELMOHR*** (Loomis '42). M. (Wm. Mohr x H 22.) Huge mulberry purple with all the magnitude and glamor of the largest tall bearded iris with the added charm of the full-flowered oncocyclus. Produces seed. We have seen some splendid seedlings from Elmoehr x Great Lakes and Sable. Would think the following also useful to use with it: Red Waves, Brunhilde, Deep Velvet, Char-Maize, Gulf Stream, Gypsy Rose, Three Oaks, Cape Bon, Grand Canyon, Mulberry Rose, etc. Dykes Medal '45....\$1.00
- EL PASO** (Kleinsorge '49). M. (Tobacco Road x Goldbeater.) Lively golden-brown. Rich blood! H.M. '50\$3.00
- ELSA SASS** (H. Sass '39). E.-M. (Tiffany x Orloff.) The first lemon-ice yellow. Still lovely when well grown. Splendid parent for this color and rich yellow plicatas. A.M. '41.....\$.50
- EMPRESS EUGENIE** (D. Lyon '52). M. (Char-Maize x Cordovan.) Rich empire yellow self. A top quality flower that will be great for breeding reds, browns, creams, whites, blends and possibly even pink. C. of C. '51. Net.\$10.00
- ENSIGN PEAK** (Roy Gorham '52). M. (Solid Mahogany x Casa Morena.) Large, wide rich deep maroon-red of impressive proportions and quality. We like it very much and know it will be a superb breeder. Net.\$5.00
- ENVOY** (DeForest '49). M. (Ethiopia Queen x Sass sdlg. 41-83.) Near black. Standards glow with red tones. Highly praised from every quarter.\$6.50
- ESCAPADE** (Tompkins '52). M.-L., 36 inches. (Tunisian Gold x Cascade Splendor.) Glowing orchid with band of gold around standards and falls\$15.00
- ESQUIRE** (Lothrop '45). M. (L 8-40 x Brunhilde.) Rich medium-deep purple with texture lines. Beautiful form and branching. Parent of Ben Bolt. H.M. '47.....\$1.50
- ESTATE** (Benson '49). M. (Birchbark x Bruno.) Wide chaste white self with superb substance. For the front of the border. Blood for whites, blues, reds, blends and cream.\$1.00
- EVENGLOW** (Clevenger '48). M. Huge lobelia violet. Its size will astound you.\$2.00
- EVENSONG*** (Frazee '50—now Mrs. Jacobson). M. (N. J. Thomas x sdlg.) Unusually wide and full. We predict a great future for this lovely Mignon and Patriarch purple iris. Nothing quite like it. Will set some seed. H.M. '50.\$5.00
- EXTRAVAGANZA** (G. Douglas '41). L. (Adios x Cortez.) Cream standards, red-purple falls. Exciting parent for neglecta and amoena breeding. A.M. '47.....\$2.00
- FABULOUS KATE** (Muhlestein '50). M. (Late Sun x Radiant) x (Pink Formal). Very large medium yellow with delightful form. There are some brown lines on the falls when first opened, but these soon clear away after a few hours. We think this will be highly useful for breeding pinks, blends, yellows and new colors associated with the tangerine beard. Highly fertile pollen. H.M. '52.....\$5.00
- FAIR DAY** (McKee '49). M. ((Miobelle x Misty Rose) x (Moontide)) x (Moontide). Very wide, heavy-substanced yellow amoena in the Pinnacle color range. Will be a superb parent for this color as well as rich yellows, blends or reds. H.M. '49.....\$4.00
- FAIRY FLAX** (P. Cook '51). E.-E. (Dwarf and T.B.) The new race of intermediates. Light blue self with white beard. 11 inches. H.M. '51. Net.\$3.00
- FAIRY FOAM** (Mitchell '48). M. Delicately marked plicata. H.M. '48.....\$2.00
- FALL DAYS** (K. Smith '47). M. (Matula x Orange Glow.) Brown blend. H.M. '47.....\$5.00
- FALL VELVET** (Dr. G. P. Brown '50). M. and Reblooms. (Autumn Sunset x September Sparkler.) Velvety purple with brown at hafts. Dependable re-bloomer even in New England. Net.\$3.00
- FANCY FEATHER** (Muhlestein '52). M.-L. 36". (Rare Marble x 46-49A: Salar x Gold Ruffles.) Blended yellow-tan standards. Falls yellow bordered bright mahogany red. A very striking plicata and one we think will be a good breeder\$8.00
- FANTASIA** (Tompkins '49). M., 38 inches. (Casa Morena x Mulberry Rose.) Blended shades of rich violet, rose and mulberry in a massive ruffled flower. Net.\$1.00
- FANTASY** (D. Hall '47). M. (40-97): (Lullaby x 35-40: Dauntless x Rameses) x 39-62: ((36-1: W. R. Dykes x Morocco Rose) x Morocco Rose)). Lovely orchid with tangerine beard. Parent of Cherie and other new pinks. A.M. '49....\$5.00
- FAR HILLS** (J. E. Wills '49). M. (Melanie x Copper Rose.) Deep orchid-pink, smooth and full. Sturdy 38-inch stalks, well branched.....\$2.50
- FAVORI** (Cayeux '34). M. (Marc Aureau x Cardinal.) Rich grape-purple.\$.35
- FIRECRACKER** (D. Hall '43). M. (Orloff x Elsa Sass.) Very bright yellow and red plicata. Splendid parent. H.M. '43.....\$2.00

- FIRE DANCE** (O. Fay '47). M. (Elsa Sass x Orloff) x (sister sdlg.). Lovely, heavily marked, red plicata. Would like to see seedlings from this and new plicatas.\$3.50
- FLAMBOYANCE*** (Tompkins '52). M., 36 inches. (Sonatine) x Veishea x Copper River) x (Mulberry Rose.) Huge ruffled, broad mulberry, violet and rose. Just a touch of Wm. Mohr blood. We fell hard for this lovely flower and know you will, too. One of Tompkin's very best\$10.00
- FLAMING FIRE** (J. Sass-Austin '50). M. (The Red Douglas x Prairie Sunset.) Very large red, lacking just a bit in substance, but should be a superb parent for reds and rich blends. \$3.50
- FLORADORA** (D. Hall '47). M. (42-10 x 42-05.) Large flamingo pink.\$2.00
- FLURRY MOHR*** (C. Rees '50). M. (Snow Flurry x Capitola.) Extremely large violet-purple. Standards a bit weak for such huge flowers. We discovered this makes a wonderful single-flower arrangement, or an ideal one to use for flat-dish work if the standards are bent down under the falls. If you cannot grow the Japanese Iris this is for you. It is breathtaking either in the garden or in arrangements if made into a "flat" iris. Your friends will be amazed.\$2.00
- FORT KNOX** (Milliken '41). E.-M. (Sungold x Chosen.) Beautifully formed light yellow. A.M. '44\$.75
- FORT TICONDEROGA** (K. Smith '48). M. (Orange Glow x Matula.) Colorful blend—one of the very best. Scarce. Net.\$5.00
- FORTUNE** (Kleinsorge '41). M. (Old Parchment) x ((Tuscany Gold x) x (Rameses)). Light copper with rich yellow undertones. Fine breeder if used with tall varieties. Blood for reds. ...\$.50
- FROST GLINT** (Whiting '51). M.-L. (Vatican Purple x West Point.) Cold blue-white of superb substance. Wonderful breeder. H.M. '51. Net\$4.00
- FROSTY BLUE** (Whiting '41). M. (Shining Waters x Gloriole.) Large blue\$.75
- FRANCES CRAIG** (Craig '52). M. (Snow Flurry x Capitola.) Perfection in a huge greyed lavender. H.C. '51. Net.\$20.00
- FRANCES KENT** (DeForest '51). M. (SQ 72) x (Melitz x Pink sdlg.) Light apricot, cream and chartreuse. Deep tangerine beard. Haft flushed pink. Here is one that is truly distinct. H.M. '52. Net\$10.00
- FUCHSIA** (D. Hall '51). M. (Tally Ho x Courtier.) New Fuchsia-orchid with tangerine beard. Will be useful with taller, weaker-stalked pinks and orchids\$8.00
- GALA FINALE** (DeForest '50). E.-M. (Vision of Mirza x Firecracker.) Yellow heavily overlaid Indian red, and appears, from a distance, to be red. Top blood for plicatas. H.C. '49....\$9.00
- GALLANT LEADER** (Wiesner '39). M. (Morning Splendor x Germaine Perthuis) x (Depute Nomblot). Fine wide red-purple. Quality blood for reds. The parent of Bellerive and other good seedlings. H.M. '39..... \$1.00
- GALLANTRY** (Whiting '45). M. (Winneshiek x Mata Hari.) Ruffled medium-deep blue reminiscent of Chivalry.....\$1.00
- GARDEN FLAME** (H. Sass '41). M. (83-34: sdgs. from King Tut) x (Miss Aravilla x 35-29: King Tut x Cardinal). Lovely, bright red. Should be fine for use with tall reds like Gypsy Rose, Velvet Mantle, etc. A.M. '43..\$1.00; 3 for \$2.00
- GARDEN GLORY** (Whiting '43). M.-L. (The Red Douglas x Garden Magic.) Accent on beauty of form and finish. Red-purple, smooth and glorious. Proving a delightful parent. A.M. '47\$1.50
- GARDEN MAGIC** (Grinter '36). M.-L. (Wotan x Ella Winchester.) Splendid red and equally gratifying as the parent of Garden Glory, Ranger and other fine reds. A grandchild of Dominion (through Wotan) which would account for its ability to put quality into its seedlings. H.M. '37.....\$.75
- GAY BLADE** (Muhlestein '51). M. (Arab Chief x 45-12: E. B. Williamson x Prairie Sunset.) Bright orange-tan. Fine parent for tans and browns.\$2.00
- GAY BORDER** (DeForest '49). E.-M. (Tiffanja x Sister to Patrice.) White plicata evenly bordered maroon. H.M. '49. Net.....\$3.00
- GAYLORD** (G. Douglas '50). L. (Extravaganza x Wabash.) Large new amoena in heavy demand. Net\$20.00
- GAY ORCHID** (Muhlestein '49). E.-M. (Nylon x Golden Eagle.) Large flaring orchid with tangerine beard. Splendid parent for this color, pinks and salmons. H.M. '49.....\$3.50
- GAY SENORITA** (Salbach '44). M. (Alta Calif. sdlg. x Miss Calif.) x (Happy Gift sdlg.). Large variegata with falls heavily lined with chestnut. Produces unusual seedlings. H.M. '45.\$1.00
- GAZA*** (Jory '49). E.-M. (Grace Mohr sdlg. x Capitola.) Large Mohr-type clay-pink....\$3.00
- GEMS OF TOPAZ** (Wilson '48). E.-M. (Prairie Sunset x Tobacco Road.) Heavy substantced topaz colored blend. Should produce rich seedlings\$2.50
- GENERAL PATTON** (Kleinsorge '47). M.-L. (310 x Bryce Canyon.) Deep red-copper. Somewhat slow of increase here, but fine color and breeding possibilities for blends and reds. H.M. '47\$2.50
- GENTLE FLORENCE** (C. Taylor '47). E.-M. (Snow Flurry x Violet Symphony.) Good blue-white with better stalk than its parent S. F. Useful blood for blues, violets and whites. H.M. '47\$2.00

- GHOSTIE** (Craig '49). M. (Madam L. Aureau x Tiffany.) Fancy striated lavender on white.\$1.50
- GIBSON GIRL** (Gibson '50). M. Rebloomer. (Madam L. Aureau x Tiffany.) A lovely plicata that is a SURE rebloomer. Net.\$2.00
- GILT EDGE** (Whiting '41). M. (Happy Days x Matula.) Yellow bi-color. Falls have light area in falls. Proving a dramatic parent for many colors\$.75
- GLADY'S MONCRIEF** (Aylett '44). E.-M. (Oregon Sunshine x Golden Hind.) Done in the manner of Pinnacle. Looked very good here last year and should be highly useful for hybridizing purposes. Only a few plants to offer this year. Net\$5.00
- GLISTENGLLOW** (Muhlestein '49). E.-M. (Snow Flurry) x (Genevieve Serouge x Mount Cloud). Very wide, heavy-substantiated white. Enough ruffling and character to give it a strong personality. Branching rather poor, its only fault, but we think you will call it magnificent. H.C. '47\$2.00
- GLISTENING COPPER** (See Introductions)
- GLORIOLE** (Gage '33). E.-M. (Souv. de L. Mischaud x Queen Caterina.) Light, frosted blue, considered a great parent, but lovely in its own right. A.M. '35.....\$.50
- GOLDBEATER** (Kleinsorge '44). M. (Rebellion x Naranja) x (Far West). Richest yellow. Proven fine parent for blends and yellows, but should be equally good for red breeding. H.M. '45, A.M. '51.....\$1.00
- GOLDEN DAYS** (K. Smith '49). M. (Yel. Plc 1-51 x sdlg.: Lord Dongan x Yellow Glory.) Clean new yellow that should breed plicatas, blends, reds and possibly pinks.....\$5.00
- GOLDEN EAGLE** (D. Hall '42). M. (38-26); ((36-11: W. R. Dykes x Dolly Madison) x (Morocco Rose)) x (Prairie Sunset). Smoothest rich yellow. Beautiful flaring form. May lack a bit in substance and its seedlings may have weak branches, but I consider it tops for hybridizing, as does, surely, its hybridizer, for it is back of almost all of D. Hall's "Flamingo" pinks. Still holds promise for breeding work in shell pinks, yellows, blends and possibly reds. H.M. '42..\$.75
- GOLDEN EPAULETS** (Grant '46). M. 36 inches. (Sunday Best x Chosen.) On the order of Mystic Melody with deeper hafts. A lovely combination and one I think will be most useful as a breeder for the "yellow amoeanas". Net. ..\$2.00
- GOLDEN FLEECE** (J. Sass '40). M. (Siegried x Dore.) Standards light lemon-yellow, falls white bordered lemon. Buds tinged with lavender. Blood for this color, plicatas, blends, variegatas and no telling what else. A.M. '42\$.75
- GOLDEN HAWK** (K. Smith '51). M. (Cascade Splendor x Sdlg.: 1-53 x Spun Gold.) Very wide, full, rich yellow, Net.....\$30.00
- GOLDEN GLEAM** (Miess '51). M. (Tiffanja x Tobacco Road.) Dandelion yellow self with lines in falls indicating its plicata blood. A very distinctive iris. H.M. '52.....\$8.00
- GOLDEN PLOVER** (DeForest '50). M. (Calderilla x Tobacco Road.) Simply stunning is this smooth, gold-dusted golden-tan self. H.M. '51\$9.00
- GOLDEN RUFFLES** (C. Taylor '46). M. (Margaret Bond x Vivacious.) Smooth, wide and showy yellow. Always commanding! Probably has an upset number of chromosomes for it has no pollen and is a very difficult pod parent, and therefore may produce unusual seedlings if it can be induced to do so. Pollens that worked on it for me last year: Baghdad, Fabulous Kate and another Pink Formal seedling: 49-21-50. A. M. '49.....\$2.00
- GOLDEN RUSSET** (D. Hall '46). M. (Invictus x 38-52) x (Golden Eagle). Gigantic russet that will simply "stun" visitors when well grown. Fine blood for this color, yellows, pinks, and possibly reds and variegatas. H.M. '47..\$2.00
- GOLDEN SHADOWS** (C. Rees '52). M. ((Nativitate x Happy Days) x (King Midas x Happy days)) x (sister.) Huge 6¾-inch blooms of warm white having an outpouring of gold through center\$8.50
- GOLDEN SPANGLE** (Cassebeer '44). E.-M. (Evolution x Happy Days.) Brighter yellow Golden Fleece type. Tall. H.M. '44.....\$.50
- GOLDEN SUNSHINE** (Schreiner '52). M. 38 inches. A clear, pure, true yellow neither on the orange or lemon-toned side. A fine addition to the yellow class.....\$12.00
- GOLDEN SYMPHONY** (Horton '44). V.L.- (Plurabelle x Rameses.) This will close the iris season with a very colorful show. Yellow standards—lavender-blue falls. Last year we reversed this description, for which we are truly sorry. H.M. '50.....\$5.00
- GOLD RUFFLES** (Muhlestein '47). M.-L. (Mary Rich Lyon x Midwest Gem.) Large heavily ruffled medium yellow. Some lines at the haft, but quite a lovely flower nevertheless, and a remarkable parent for pinks, creams, blends and yellows. Would like to see this crossed on Snow Flurry, Glistenglow or New Snow. Its pink grandchildren are superb. H.M. '48. . \$2.00
- GOLD SOVEREIGN** (Whiting '49). M. (Ola Kala x Rocket.) Simply stunning is this richest orange-yellow. Top blood for vivid colors in yellow, orange and possibly reds. H.M. '50.....\$5.00
- GOOD NEWS** (Kleinsorge '46). M. (Mexico x Tobacco Road.) Glistening golden brown. Believe this is my favorite of such colors. H.M. '47. Net\$1.50
- GRACE MOHR** (Jory '35). EM. (Wm. Mohr x T. B. yel. Mitchell sdlg.) Tall violet with "mohr" veining. Sets seed. A.M. '39.....\$.75

GRACIOUS LADY (C. Taylor '52). EM. (Lake George x Great Lakes.) Large smooth blue with a delightful dip in the center of the falls. A grand pollen parent. 34 inches.\$7.50

GRAND CANYON (Kleinsorge '41). M. (Treasure Island x Far West.) Rich plum and copper blend. Overlooked as a parent. Would suggest using Gypsy Rose, Cape Bon, Honeyflow, Casa Morena, Three Oaks, Dream Along, Sunset Road, Susitna Sunset. A.M. '44.\$.75

GRATITUDE (Snyder '50). EM. 40 inches. Rosy blue-bell self with light brown suffusion at the hafts. This hardly tells the story of an altogether distinct and delightful iris that will have wide appeal when it is distributed. A grand iris. H.C. and C. of C. '49.\$3.00

GREAT LAKES (Cousins '38). M. (Dominion sdlg. x Conquistador sdlg.) Quality blue that has been widely used as a parent and with great success. Dykes Medal '42.\$.75

GRECIAN ROBE (Heller '48). M., 46 inches. (Sdlg. of Old Ironsides) x (Sungold x Chosen.) Creamy white with gold border on both standards and falls. Extra large. A superb show specimen. Should be a great breeder for creams, yellows and white.\$5.00

GREENGLOW (Muhlestein '49). E.-M. (Sister to Glistenglow.) Very large, full greenish-chartreuse white. Should be highly useful for breeding toward greens or for creams, blues and whites. H.C. '48.\$3.00

GREEN IVORY (See Introductions)

GREEN MOHR* (Muhlestein '51). M-L. (Wm. Mohr x Chosen.) Strong greenish-chartreuse self—the falls having a slight lavender flush when first opened. Full "Mohr" shape. Will set seed. Won Seedling award Salt Lake City and C. of C. '50. H.M. '52.\$5.00

GREEN PASTURES (Heller '47). E.-M. (Old Ironsides x Oregon Sunshine.) Yellow-chartreuse self. Form could be improved and may be a difficult grower in some sections—especially the mid-West, but of interest for hybridizing. Bluish-tipped beard. H.M. '47. Net.\$2.00

GREEN SHADOWS (H. Sass '43). M. Sulphine yellow self. Odd, but unusually fine in some seasons.\$2.00

GREEN SPOT (P. Cook '51). E.-E. (T.B. and Dwarf.) New race of intermediates. White with horizontal falls that have a one-half inch patch of solid green at end of beard. 12 inches tall. Net.\$4.00

GREIG LAPHAM (Gage '48). M. (Spun Gold x Gloriole sdlg.) Smooth, mellow, lovely medium yellow. H.M. '48. Net.\$1.50

GROS GRAIN* (Craig '50). (Wm. Mohr) x (Purissima x Gudrun.) Grey-lilac veined violet.\$2.50

GUIDING STAR (Tompkins '51). M. 38 inches. (Damascus x Rocket) x Acadia x Damascus.) Richest lemon-yellow self including beard.\$7.00

GULF STREAM (O. Fay '46). E.-M. (Dymia x Narain.) Very dark blue-black. Highly valuable for "black" breeding. Stunning. H.M. '46. Net.\$1.50

GYPSY (Kleinsorge '45). L. (Rebellion x Naranja) x (E. B. Williamson). Wonderful variegata. Blood for this color, blends, reds and oranges. H.M. Net.\$.75

GYPSY BARON (Schreiner '42). M. (Claribel x Mme. L. Aureau.) Almost a purple self, this heavily marked plicata.\$.75

GYPSY CLASSIC (DeForest '51). M. Nightingale) x (Prairie Sunset x Tobacco Road.) Stunning new brown. H.M. '52.

GYPSY MAID (Gage '45). M.-L. (Arethusa x Red Bonnet.) Pinkish blend not unlike Lancaster but taller and better branched. Fine blood for reds.\$1.00

GYPSY ROSE (Whiting '46). M. (Amaranth x Three Oaks.) Tall, well branched, red-copper blend. Rich and wide of parts; cannot miss as a top parent. We bloomed some lovely things from it x Miogem. Finest blood for reds. H.M. '49.\$2.00

HALLELUIAH (Welch '46). E.-M. (Gudrun x Easter Morn.) Fine quality cream. Sister to B50, the parent of Blue Blazes. We think this cream will be most useful for blue, cream, white, pink and yellow breeding.\$2.00

HAPPY BIRTHDAY (D. Hall '52). Very large brilliant deep pink. Luscious flower with a dark tangerine beard. H.M. '52. Net.\$15.00

HAPPY TALK (See Introductions)

HAPPY VALLEY (Miess '50). M. (Mountain Sky x Narain.) Lovely medium blue. Splendid breeding for blues—either dark or light.\$5.00

HARRIET THOREAU (P. Cook '44). M. (Sister to Dreamcastle.) Clean orchid-pink. Fine parent. H.M. '45.\$.75

HARLEQUIN (Stevens '49). M-L. 32 inches. (Sdlg. x Tiffany.) This bizarre plicata will find lovers of iris coming back to it again and again. Silvery falls flare and have a veining and dappling of chocolate and purple.\$4.00

HARVEST BLUE (Dr. G. P. Brown '50). M. and Re-blooms. (Autumn Sunset x Sdlg. of Missouri.) Not unlike Missouri in many respects, but a fine re-bloomer. Net.\$4.00

HEATHER ROSE (D. Hall '50). M. ((44-41: (42-26: Gay Troubadour x Mandalay) x (Overture)) x (Courtier.)) The name describes the color—a large flower of quality. Will be a fine producer of many interesting colors in the new race of pinks, orchids and salmons. H.M. '51.\$5.00

- HEBRON*** (Jory '49). E.-M. (Grace Mohr sdlg. x Capitola.) Honey brown with full Mohr shape.\$4.00
- HEIGHO*** (Craig '9). M. (Purissima x Capitola.) This is my favorite of the Purissima x Capitola seedlings I have seen thus far because of its very heavy substance and the signal patch at the beard. Extremely vigorous. H.M. '49.\$10.00
- HELEN COLLINGWOOD** (K. Smith '49). M. (Extravaganza x Louise Blake.) Beautiful, superb neglecta. Almost an amoena—will be highly useful for hybridizing, surely. H.M. '50. Net\$12.50
- HELEN FITZGERALD** (H. Thorup '48). E.-M. (Purissima x Wasatch) x (Dolly Madison x W. R. Dykes) x (Souv. de Mme. Gaudichau x Ricardii). Smooth lobelia violet self. Such self colored iris are rare. This is a very large flower. Superb as an exhibition variety. Would recommend it as a splendid parent for whites, plicatas, pinks, blues and possibly amoenas to give them size and vigor. H.M. '49.....\$2.50
- HELEN LOUISE** (Lapham '52). M. (Barbara Luddy x Paradise Pink.) Deep salmon-pink, red-tangerine beard. H.C. '51. Net.....\$12.00
- HELEN MCGREGOR** (Graves '46). E.-M. (Purissima x Cloud Castle.) Superb light blue. Does fade in hot sun, but if planted in partial shade is magnificent. A wonderful exhibition flower, and will undoubtedly go down in history as a great breeder for blues and whites. Dykes Medal '49\$2.50
- HELEN MCKENZIE** (Graves '50). M. (Franconia: Alba Monte x Snowking) x (Mt. Jefferson: Snow Carnival x Cloud Castle). Pure white—not a touch of off color. Highly praised. H.M. '50. Net\$12.50
- HELLEBORE** (See Introductions)
- HERITAGE** (D. Hall '49). M. (Tally Ho x Courtier.) Smooth pink deeper than Cherie. Should be a fine parent. H.M. '49, A.M. '51.....\$8.00
- HIGH COMMAND** (Long). M. (Eternal City x Louvois.) Very large brilliant, different, variegata. Splendid. A limited supply. Net.....\$2.50
- HIGH SEAS** (Corey '52). M. (Snow Flurry x Cloud Castle.) Impressive is the word for this truly magnificent ruffled silky blue-white on 40-inch well branched stalks. The wide flowers will be beautiful in any company. Should make a superb show specimen and can't miss as a breeder for blues and white. H.C. '51, H.M. '52\$12.50
- HI TIME** (D. Hall '50). M. (42-07: Golden Eagle x 39-62) x (Premier Peach). Lovely golden apricot self. One of Hall's best. We think it holds great promise as a breeder, and of course it has good garden value. H.M. '50.....\$5.00
- HIGH TOR** (Roy Fielding '52). M., 40 inches. (Snow Flurry x Azure Skies.) Huge ruffled chicory-blue, falls slightly darker than standards. Floriferous and very fragrant. H.C. '51. H.M. '52. Net.....\$10.00

- THE KNOCKOUT** (Muhlestein '51). M. (Remembrance) x (Ming Yellow x Prairie Sunset). Rich yellow standards, falls lighter, brushed heavy yellow at hafts. Delightful in its charm and distinction. Will produce shell pinks when bred to them \$5.00
- THE MAD HATTER** (Lyon '51). M. (Ranger x Cordovan.) Deep rich mahogany red. Large and tall. With this blood it cannot miss being a superb breeder with Aria, Technicolor, Pace-maker and Burmese Ruby, to mention a few. H.M. '51. Net. \$12.50
- THE ORIOLE** (Schreiner '47). M. (Spokane x El Tovar.) Variegata with rich gold standards, blackish-maroon falls. Striking. \$1.00
- THE PENGUIN** (Goodman '48). M. (Madam L. Aureau x sdg of Golden Eagle.) Unusual brownish-marked plicata. A little different blood. May give good plicatas to the pinks—some with Tangerine beards when bred to things like Pink Formal, SQ 72 or other Sea Shell derivatives. 38 inches. Net. \$3.00
- THE RED DOUGLAS** (J. Sass '37). M. (Sister to Red Wing x Cardinal) x (Joycette). Large red-purple. Dykes Medal '41. \$.75
- THE SHOWMAN** (Muhlestein '50). M-L. (Arab Chief x Bryce Canyon.) Brilliant, wide, red-copper. Similar in coloring to Sunset Blaze, but blooms after it. Rather high branched. A wonderful parent. H.C. '48. \$3.00
- THE TANNER** (Muhlestein '51). M-L. (Fortune x Tobacco Road.) Flaring mustard-tan. Quite different to anything we have grown. A wonderful parent both ways, but should be bred to something with height. 30 inches. \$5.00
- THOTMES III** (Kleinsorge '50). M. Glistening golden-tan with bronze beard. A glorified Tobacco Road. H.M. '51. Net. \$10.00
- THREE CHEERS** (P. Cook '45). M. (Wabash x ((Susan Bliss x Morning Splendor) x (Amoena sdg.)) Tall, large neglecta of beautiful shape and proportions even though high-branched. H.M. '46 \$1.00
- THREE OAKS** (Whiting '43). M-L. (Sister to Tea Rose.) Striking brilliant rich coppery pink blend with blue flush in falls. Wonderful parent for blends and reds. A.M. '49. \$1.00
- THREE SISTERS** (DeForest '41). M. 38 inches. (Burning Bronze x Naranja.) Cream standards, bright red falls. May be most useful in both amoena and variegata breeding. \$1.00
- TIFFANJA** (DeForest '42). E-M. (Naranja x Tiffany.) Lovely yellow plicata. Fast of increase. Should be very useful for oranges, plicatas and reds. A.M. '46. \$.75
- TIFFANY** (H. Sass '38). E-M. (King Tut x Morning Splendor) x (?). The first large yellow plicata and has been a remarkable parent. Some of its seedlings have a tendency to rebloom. A.M. '43 \$.50
- TIP TOP** (D. Hall '47). Small white ground plicata heavily marked purple in standards with border of purple on falls. May be a good plicata parent \$1.00
- TISHOMINGO** (Caldwell '42). M-L. Large wisteria blue. A.M. '44. \$1.00
- TOBACCO ROAD** (Kleinsorge '42) E-M. (Aztec Copper) x (Far West x Jean Cayeux). Wonderful break in the brown class, and proved a remarkable parent. Breed to tall reds for quality red breeding. A.M. '46. \$2.00
- TOSCA** (Benson '49). M. (Brunhilde x Gloriele.) Stunning ruffled lavender-blue with domed standards and wide flaring falls. Superb substance. Top blood, don't you think, for breeding? H.M. '50. \$4.00
- TOP SCORE** (Salbach '48). M. Stunning new variegata. Yellow standards, orange-brown falls. Might be tops with Rocket, Orangeman, Orange Gem, Mexico and Gold Sovereign for oranges or Staten Island, The Oriole, High Command or Black and Gold for variegatas. Net \$3.00
- TRAIL BLAZER** (Milliken '51). M. Large red-mulberry-purple shot with blue at the tip of the beard-and through the center of the falls. A touch of ruby-red flanks the cinnamon beard. Tannish tones touch the standards and border the falls. Quite a different color arrangement. \$5.00
- TRANQUILITY** (O. Fay '50). M. (Snow Flurry x Katherine Fay.) Superb milk-white with white beard. Splendid for wonderful blues and whites. H.M. '50. \$10.00
- TREVA** (DeForest '45). M. (Rio Oro) x (Sandalwood x Amitola). Luscious golden apricot blend. Wonderful blood for blends, oranges and possibly reds. H.M. '46. \$1.50
- TRULY YOURS** (O. Fay '49). M. (44-43: ((Rameses x Far West) x (D. Hall's 42-35)) x (Zantha). Huge, unusual yellow and white combination with heavy ruffling. Rather anxious to see what this and Song of Songs will produce. Because of its size and distinction it will be highly popular. H.M. '49, A.M. '51. Net. \$15.00

TRYAGAIN* (Aylett). M. (Grace Mohr x Mohrson.) On the order of Suez. Fertile both ways. Net\$5.00

TWILIGHT SKY (O. Fay '48). E-M. (Pink Cameo x Floradora.) Nicely formed, clean dependable pink with tangerine beard. H.M. '50.....\$3.00

TRANQUIL MOON (P. Cook '48). M. (Pink Reflection) x (Cream sdlg. from Orchid-pinks and dominant yellows). Yellow standards, white falls bordered yellow. Good substance. H.M. '50\$5.00

TWO SNOWS

TWO SNOWS (Aleita H. Scott '52). M., 40 inches. Snow Flurry x Snow Carnival.) Big ruffled crystalline white with white-tipped, gold beard. Great substance and lasting qualities. Here is a show specimen and one that cannot miss as a breeder. Winner of the Silver Medal at the 1952 Horticultural Society New York show. (Pictured above.)Net \$12.50

UTAH FIESTA (Muhlestein '48). E-M. (Fiesta x Dubrovnik.) Rich orange blend with strong lavender flush in falls. Lovely enmass, colorful\$1.00

UTAH LAKE (Muhlestein '50). M-L. (Shining Waters x Great Lakes.) Large mid-blue self. Vigorous\$1.00

UTAH SPECIAL (Muhlestein '50). M-L. (Old Parchment x Mellowglow.) Delectable, luscious, delicate blend of peach, apricot, pink and yellow. Beautifully formed, ruffled flower. Should have partial shade from extreme sun for it will fade. May have an upset number of chromosomes. At last has set pods for me by Java Jewel and a Pink Formal derivative. Charm personified\$7.50

UTAH SUNSET (Muhlestein '51). E-M. (Honeyflow) x 46-16: sister to Sunset Road). The largest and smoothest blend we know. The hafts are so smooth we know it will be a boon to hybridizers. Its seedlings are very fine. Luscious in its smooth blending of onion-skin pink, buff and salmon tones. H.C. '49.....\$7.50

VALGANZA (See Introductions)

VANDABETH (Miles '52). M., 36 inches. (Vanda x Elizabeth of England.) Rich pale blue smoothly overlaid with heliotrope that gradually deepens at the heart of the flower. The standards are conic, the flaring falls are wide and have a dip in the center that gives the flower a lilt and charm. A rich yellow beard graces the falls.....\$15.00

VANITY FAIR (D. Hall '51). M-L. (Cherie x Fantasy.) Clean medium pink with deep red beard. Superb form and substance. H.M. '52...\$12.00

SPURIA IRIS

SPURIAS

Spurias belong to the beardless species. Their hard, strong, rhizomes are ideal for holding banks. They bloom after the tall bearded season has closed. Their orchid-like flowers are splendid for corsages or for bouquet work and arrangements. Here is an open field for hybridizers who desire to work with this species. Their disease resistance make them the easiest iris to cultivate.

(Spurias will be shipped after Sept. 1st—Order these on a separate sheet.)

AZURE DAWN (Nies '47). (ochroleuca x Monspur, F2.) Blue-lavender with lemon-chrome signal patch. Net\$1.00

BRONZE BUTTERFLY (Brenan '51). (Bronzspur x Ochraurea.) Truly the most brown spuria I have seen. H.M. '51.....\$6.00

BRONZSPUR (Nies '41). (ochroleuca x Monspur, F2.) Blend of brown and yellow vined sepia. Splendid parent for many colors.....\$1.00

FAIRY LIGHT (Thorup '49). (Shelford Giant x yellow spuria.) Lemon-chrome. Flaring falls bordered one-eighth of an inch white. Very vigorous of growth and increase. H.M. '48 \$2.00

FAIRY WAND (Washington '31). Unusual blended tan\$1.00

GOLD NUGGET (Milliken '31). Rich golden yellow self\$1.00

MONNIERI (may be only a garden hybrid of I. ochroleuca.) Full light yellow.....\$.50

SAGATUCK (Nies '41). (Ochroleuca x Monspur, F2.) Standards lavender shading to yellow at the base; falls yellow, veined with bronze and bordered with lavender. Wonderful parent. Net\$1.25

WADI ZEM ZEM (Milliken '42). Beautiful, large, clear cream. Net\$3.00

WHITE HERON (Milliken '48). Perhaps the giant of all spurias. The shape, size, and over-all quality is superb. Almost white with cream-yellow shadings at the center. H.M. '50..\$4.00

DORTHEA K. WILLIAMSON (Williamson 1918). (fulva x foliosa.) Hexagona hybrid. Not a spuria, but a lovely violet hybrid that requires somewhat the same growing condition. Net\$.50

Comments and Hybridizing Hints

Because the past few years I have given extensive hybridizing hints, listing the various color classes, I am, this year making only slight comment on the subject. Most of the American Iris Society membership and, in fact, a good many iris lovers, know the mechanics of hybridizing and do some "dabbling" to procure seedlings. There is no thrill to compare with that of raising seedlings, and the satisfaction that comes when a real jewel unfurls its petals to view for the first time.

We have a goodly supply of 1952 Hybridizers' Catalogs and Handbooks left over from last year, so anyone who may not have a copy and would like the breeding hints included therein may have one by sending 5c to cover cost of mailing.

Leaving out the many pages of breeding hints will enable us to get the catalog out a bit sooner. Unforeseen delays have held us up this year, and this, too, has caused us to make the above decision. I will, however, mention a few new iris that should prove superb parents, and suggest some uses for them in the breeding program.

NEW TRENDS

Some recent trends have been planned while others have come by chance and the hybridizers are working to expand their possibilities. We might mention a few of these.

RUFFLING

With the advent of Snow Flurry a new iris shape came into being. And with Midwest Gem came the "laced" edge found in such iris as Chantilly, Song of Songs, Gold Ruffles and Truly Yours. Lavender and Gold Lace came from a sister to Midwest Gem (Matula) and therefore carries similar blood lines. We are not quite sure where Party Dress inherited its ruffling, although back of SQ 72 we suspect Purissima blood and, of course, the parent of Hall's 42-10 is Golden Eagle whose parent, Prairie Sunset, boasts some of the same blood found in Sass' Midwest Gem and Matula. It is quite likely that blood of the Diploid (24 chromosomes) may be in part responsible for ruffling since a diploid is the pollen parent of Snow Flurry. At any rate ruffling is here and is adding much charm to a good many modern iris. Chantilly is proving a delightful parent and grandparent—it giving some splendid pinks with ruffling attested by Rosedale, and still others to come, including some true pink selfs. We have combined the blood of Party Dress and 49-11C, now named Pink Fulfillment, with pleasing results and retaining the ruffling of Party Dress and the great-grandparent Gold Ruffles. Clara B is proving a superb breeder for ruffling. One of its seedlings, a white with heavy laced edges, is so ruffled and laced the petals open with some difficulty, being interlocked one with the other, but once open it is a delight to see. Azure Lake has the ruffled, or laced, edges on the fall-petals and perhaps inherited this quality to a great extent from its parent Azure Skies, so we would recommend Azure Skies as a breeder of ruffling, and it might be combined with the fore-mentioned varieties. Any of the children of Midwest Gem such as Salmon Shell, Ruffled Gem and Pale Primrose, could be useful to breed ruffling. In the browns Hellebore, Ruffled Gem and Brownland may be used. Ruffled Gem is proving a fine parent for Shell Pinks, and its by-products, and combined with Chantilly has produced a host of heavily ruffled seedlings for my friend, Willis Madsen. We have heard of some lovely things produced by Mrs. Ralph Nelson from Chantilly and Rose Splendor. One thing we would suggest in using Chantilly—try to breed it with very wide flaring varieties if possible.

TRENDS IN REDS

This color has long evaded the iris hybridizer, but some great strides have been made in recent years. The use of Aztec Copper, Matula, Garden Glory, Apex, Damascus, Rocket and Casa Morena (with considerable line-breeding) gave C. W. Tompkins 50-90 being introduced this year as Defiance. A study of his lines could help any breeder working in this color. Lapham's reds coming through Red Gleam, also showing line-breeding, are a good case in point and should be studied. His Pacemaker, and its parent Red Waves, cannot be overlooked in a red breeding program. The Kleinsorge browns and coppers will be useful in the quest for better reds. We are most happy to see Carl Taylor come up with Hellebore from this type of breeding for we think the blood of Snow Flurry has much to offer in the way of form, stalk and vigor, and of course an almost entirely new line of red-breeding. We look for width and ruffling to come through Hellebore. We like the finish and color Garden Glory gives its "children" and the one thing to guard against, perhaps, in its use is its height, so it would be wise to select parents that are tall to give the seedling a chance for greater height. Yet some iris we like just as they are, and they have their place at the front of the border. (What a sad sight the iris garden might be if every variety grew exactly the same height.) My Burmese Ruby and Deep Maroon are both proven fine parents for reds, and should find a useful place in the "red" line. Craig's Molten is proving a great breeder in this color. We rather suspect Oriental Glory might give some superb things, as should Campfire Glow, although these two will have a strong tendency, perhaps, to produce red blends rather than pure red selfs. Relentless crossed with Pacemaker gave Lapham his finest red to date, from all reports, and is a cross that could be repeated time and time again with pleasing results. Moontide, a yellow, having Red Gleam as a grandparent, is proven. Technicolor cannot miss as a good breeder. Ranger, while fine in itself, produces rather rough hafts and gives a good many of its offspring a finish prone to rub off (or mark easily)—giving the petals an injured appearance. We like Quetchee, Color

Sargeant, Pequot and Redwyne very much and believe they hold promise as breeders. Char-Maize might be combined with reds, too, with pleasing results. Wm. J. McKee has introduced the blood of Radiation into his "red" line to get "reds with red beards", and already some success has been achieved. A little imagination will undoubtedly bring surprising results (one way or the other) and who knows where the break for true red may come. The yellows such as Moontide and Bellerive will take out much of the purple influence of some of the reds, as will the browns.

THE PINKS

Great strides have been made in the pinks since Dr. Loomis' Sea Shell first appeared about 1936, followed by Melitza, and then David Hall's Flamingo Pinks in 1942. They are assuming depth of color, better form, ruffling and considerable substance as attested by almost any of the newer introductions. Personally we like the ruffling and form Midwest Gem blood has given us through the use of Gold Ruffles. Ruffled Gem and its sister, Salmon Shell, are both giving fine pink and salmon seedlings; their children are usually blessed with the heavy stalks and wide flowers associated with Midwest Gem blood, but, of course, we use pinks with these Midwest Gem children to insure a good percentage of pink flowers. Some recent introductions will give the hybridizer a better chance to produce quality over the very earliest introductions. Among these we would suggest: Pink Formal, Cherie, Pink Sensation, Paradise Pink, Party Dress, Salmon Shell, Cloudcap, Dolly Varden, Vanity Fair, Ballerina and Mary Randall. The latter is in the orchid-toned pinks and will surely be a wonderful breeder for its own coloration as well as pinks and salmon-toned flowers, and it may help to intensify the pink coloring; and for this reason I am introducing Raspberry Ice Cream. Ola Kala blood with the shell pinks may help to brighten and deepen the color for us. The deep blends are too strong in their coloring and "overpower" pink in the first generation or two. On the other hand light blends such as Midwest Gem, Prairie Sunset and Nylon have shown their compatibility with the pinks and often deepen, or enhance, the color in the first or second generation. As mentioned before we have tried to avoid the use of Flora Zenor and Melitza blood, although the latter is a much better progenitor than the first. Flora Zenor has a strong tendency to produce small flowers often marked at the hafts or possessed of unclean falls. While SQ 72 has been a good breeder I feel its seedlings, like Pink Formal and Cloudcap, are steps forward and much more likely to give the quality necessary to compare favorably with seedlings being produced today. Things like Paradise Pink and Strathmore are different breeding lines, not closely related to the pinks descended from the Loomis and Hall lines, and will, therefore, be good blood refreshment to use for vigor or to intensify coloring. We look forward to the descendants of Moonlight Serenade for surely when bred with the pinks it will throw some of that coloring and when they carry the size and form often found in Snow Flurry's lines some really good things may be expected. I rather suspect Ruffled Organdy will be a fine breeder with the shell pinks. Some blood refreshment will be most desirable to insure vigor and other qualities we hope to incorporate into this color class.

ORANGES

With the advent of the shell and flamingo pinks came their by-products and gave the break to give us true oranges. The road to orange via the deep yellows, etc., gave us some rich yellows but nothing really approaching true orange. Hall's Melody Lane, described as apricot, should produce this color. Salmon Shell, Pink Formal, Pink Salmon and Apricot Glory produce these colors. Apricot Glory has the strongest tendency to throw the ORANGE color and this year we are introducing the first of its children, Orange Creamo, and, happy to say, it has as grandparents both Salmon Shell and Pink Formal. It should be a top notch breeder for oranges and apricots. Hall's new June Bride and Temple Bells will be good for these colors. New Horizon and Apricot Supreme should also prove grand breeders for these shades as well as other colors, including pinks.

WHITES

Little may be added to last year's comments. Snow Flurry and its parent, Purissima, and their seedlings, still hold preeminence in the white-breeding line. One cannot go wrong using Snow Flurry or its seedlings. We are happy to have added Mrs. Alita Scott's Two Snows to this fine collection of whites. The blues, as well, from this fine parent will be good white breeders. Although Cahokia is a light blue it is so strong in white bloodlines it makes a superb breeder for whites when mated to such things as New Snow, Lady Boscawen, Spanish Pecks, etc. Mrs. Sidney Mitchell, Silver Tower, White Sprite, Jack Frost and High Seas should be fine white breeders. And from L. W. Cousins I am fortunate to offer Canadaway that is sure to be a great addition to this class because of its size, width, form and substance.

BLUES

I am finding Sky Song one of the finest breeders for blues. Cahokia is unquestionably great as is Helen McGregor. Snow Flurry and Azure Skies combined have produced some good blues, one of which, High Tor, by Roy Fielding, was introduced last year. Great Lakes has been a truly great influence in our modern blues. Blue Rhythm is proving a superb parent with the right choice of the other line. Tosca and Jane Phillips will be grand parents. Azure Lake will give some ruffling, perhaps, and should combine well with the better-branched Snow Flurry seedlings like Dark Tower and High Seas. Chivalry and its later introduced sister, Laddie, should be excellent parents. Blue Ensign, and now its bluer child, Arabi Pasha, from England, cannot be overlooked as breeders and are not closely related to most of the American blues. Gracious Lady is the same breeding as Blue Valley and Keene Valley and all are known good breeders. My best blue to date may be from Sky Song x Gracious Lady. I thought at first this was from a hoogiana seedling, however, after

viewing the remainder of the sisters to bloom last season and looking over the Gracious Lady seedlings in bloom at the same time I am convinced a grain of pollen may have remained on the tweezers to produce this one seed thought to be from the hoogiana seedling. Perhaps my second best blue is from Sky Song x Blue Rhythm, although I have several others from a Cahokia seedling and a few by Cahokia that look very good and further testing will be required to make final selections. But if you want something truly different in the blues try Sea Lark on some of the blues and whites derived from Snow Flurry—or to Snow Flurry herself. Clifford Benson produced several fine seedlings from Snow Flurry by this parent and the best of them carried some of the Sea Lark-flush of intensified color in the standards or falls. We cannot pass this color without mention of Lady Ilse (Kenneth Smith's new blue) and Mr. McKee's fine Ponder—they were, indeed, impressive new blues here last year—both possess that smoothness we like so well. Mrs. Suiter's Sun Lakes also has a smoothness of finish inherited, perhaps, from its fine parent, Sylvia Murray, that will also continue to be a good breeder for years to come.

"BLACKS"

So many good dark iris are to be had, an easy choice of parents may be made. All the better darks seem to be coming through Sable and Black Forest. Storm King cannot be overlooked and we think Vatican Purple, Down East, Velvet Dusk, Purple Flash, Ebony Queen and our own Night Life and After Midnight will be good breeders. Fay's new Black Hills and Schreiner's Black Diamond will be used a lot. Cook's Sable Night is destined to be widely used as will some of his new blacks not as yet introduced. My finest dark to date comes from this combination: (Night Life) x 48-55A: (Black Forest x After Midnight). Its number is 51-133A and it has such splendid finish and superb substance we are, indeed, proud of it. Harold Odle of Wickenburg, Arizona, has a series of seedlings from Snow Flurry x Sable that when combined with some of the above-mentioned "blacks" will surely produce "the works". We like the infusion of Snow Flurry's blood wherever possible for all the color classes due to its vigor, form and good heavy stalk qualities. Dymia and its child, Gulf Stream (and its child, Northwestern) will be useful to get the dark beard into flowers where a self beard is desired. Arabi Pasha might be good here, for the same reason. And Mrs. Crosby's Concord Velvet will be useful for its height, size and good width of petals, as will Pagan Royal and the good darks from Snow Flurry breeding, like Dark Tower.

LIGHT YELLOWS AND BI-COLORS

Mention of these is made primarily because of Milliken's fine Montecito. It is on the order of Cream Gold, Tranquil Moon and Song of Songs. A big flower having a lovely shape. In the Pinnacle-type "yellow amoenas" it still stands out as a leader and I like its shape and size better than Summit, yet, personally, I fell for Mystic Melody for its smoothness, form and other good qualities—it performed beautifully on a first year plant. We hear of a lovely new yellow and white "amoeana" from Mr. Brummitt of England produced from Admiration. Here might be a clue to a breeder for this color class. Tompkins' Lamplit Hour can be useful here, but should be bred to one like Fair Day with a good heavy stalk. We suspect that perhaps Ruffled Organdy might be one to use for this color class.

AMOENAS

Wabash and her seedlings like Gaylord, Criterion and Chiquita still hold prominence in this country. Gaylord here was, indeed, an improved Wabash. The stalk and branching left little to be desired. We have heard of some superb things coming through Extravaganza by Three Cheers (a near Amoeana—really a neglecta) and other good ones from Extravaganza by Rumba Rose. We fell for Chiquita with its ruffled petals and believe it is destined to be a great favorite for years to come. We are introducing Honor Guest for its good growing and blooming habits as an addition to this class although it is not quite an amoeana. Helen Collingwood and now Mardi Gras are two from K. Smith that will be widely used in this color class. Step Up and its parent, Mist Glow, are my contributions to this color class and they bring a little new blood into the lines already in use. Again we think the addition of Snow Flurry blood may be good, as might some of the better and more vigorous pinks like Pink Formal, Cherie and Cloudcap. Maytime, too, may hold promise here, as might Cook's pinkish bi-color, Morning Bright.

BLENDS AND BROWNS

As with most of the other color-classes, the blends have tended to become smoother. With the advent of the Sass blends like Prairie Sunset, Matula and Midwest Gem, and the Kleinsorge things coming from Far West, and the Whiting iris from the Sass lines, China Maid, Summer Tan, etc., a whole new vista of colors was opened. Aztec Copper and its child, Tobacco Road, have done much to enhance the blends, the browns and coppers. Mexico is a notably fine breeder for blends and other rich colors and has been put to great use by its originator as well as a host of other breeders. Because the blends, browns, and coppers have been rather closely bred and intercrossed I will not touch on the copper and brown breeding separately. We are taken with Spellbound, Summer Song, Thotmes III, Golden Plover and Spanish Fandango, and expect good things to come from them. Utah Sunset and its sister, Glistening Copper, are very smoothly finished and produce excellent seedlings. Utah Sunset, however, should be crossed with something to hold down the size; yet no fast rule may be set since its finest golden brown seedling was produced from 49-2, a huge brown blend from Elena Choosing x (Zebulon x Golden Eagle) and interesting it is because of the "double-dose" of Oncocyclus blood—its number is 52-7. If it lives and proves as worthy as first

blooming indicated, it will be named. In the orchid blends we fell hard for Tompkins' Flamboyance—a big ruffled, fully formed flower with quality written all over it.

CREAMS

This year we have added M. D. Wallace's Spic and Span to our list of introductions as worthy because of its quality and performance. Those mentioned last year are still good: Amandine, Desert Song, Snoqualmie and the bi-cream Ruffled Bouquet. We like Patricia Joyce, but it is best in warmer climates, or in the Pacific Northwest. Our new Green Ivory might come here, also, and will surely be a good parent for this class. We would strongly recommend Snoqualmie be crossed with the best of the creams on the market, for it is quite a fine parent.

PLICATAS

The Sasses gave us our real break in the yellow plicatas and did much to help bring this lovely class to the popularity it deserves. Tiffany, Orloff and Bonanza were the first of the yellow plicatas, and through them have come all the better American plicatas with the yellow or cream ground. Hall's Firecracker, Fay's Fire Dance and my own Rare Marble are good breeders—all descending from Tiffany and Orloff. Craig, combining some of Mitchell's best seedlings with the Sass iris, China Maid and Los Angeles, has produced splendid new plicatas. DeForest has accomplished much with the yellow plicatas as well as the blue-and-whites, even the latter come through Blue Shimmer—a Sass iris, and others have had success using Blue Shimmer, including Dr. Loomis, by the production of Castle Rock. We like Caroline Jane (a seedling of New Hope) very much. We have admired Aldura for its good quality, and later its seedling Blue Rim, really stunning as a garden subject and show specimen. Mrs. Carlston of Salt Lake has produced a lovely plicata from Snow Flurry x Aldura. Carl Larsen has a host of fine things through Aldura in plicatas, one especially fine yellow-ground, big, wide cinnamon-marked, that will create quite a stir when ready for distribution. Tompkins has produced some very fine plicatas, among them Starkist and Rendezvous, with still others to come. Henry Sass has some noteworthy new things, fully as striking as the Oncocyclus and their derivatives. Port Wine is a forerunner to these newer plicatas that are even more startling in their color and over-all beauty. In going over their pedigrees I was impressed by the fact that Henry had used Midwest Gem, Dore, Prairie Sunset and other blends coupled with Minnie Colquitt, Blue Shimmer—even Flora Zenor (perhaps this is where Flora would shine—in a plicata breeding program) and Aleppo Plain. It is surprising how many times Aleppo Plain is found in the pedigrees of these unusual new plicatas. Personally I have taken a strong liking for the Pretty Pansy type and Henry Sass has several refinements in this color range.

VARIEGATAS

This class has been slow to improve. Staten Island is very fine and Paul Cook's Pretender will set a new standard for this color, being different, quite, from the yellow and red variegatas. One similar to Pretender is Brenan's new Valganza. It is likely Extravaganza will prove a fine breeder for this color. The blue and white amoebas have a strong tendency to throw variegatas and if some are produced with smooth hafts they will find a place.

HYBRIDS

True hybrids are the result of crosses between two species of iris. Oncocyclus and Regalias have been crossed with the Tall bearded to give us an unusual race of plants. A goodly number of hybridizers are striving for that exotic Oncocyclus appearance in a large, tall, well branched variety. C. G. White has accomplished wonders along this line, yet his varieties, I am afraid, are so strongly Oncocyclus bred that they will be difficult to grow in some places. White has broken the fertility barrier and these new plants nearly all have large quantities of fertile pollen. Perhaps Capitola may still hold most promise for the average hybridizer unable to grow the onco-like plants that will be difficult in some localities. Ormohr, Elmohr, Parchute 2 and other Wm. Mohr derivatives should still be employed, for they ordinarily produce only a few seeds and until we get the mass-production found among the more fertile pure tall bearded iris we cannot expect a great many outstanding seedlings. Jory's line-bred Wm. Mohr derivatives like Moab, Hebron, Gaza and Askalon are interesting garden plants and may be good breeders. Most Capitola derivatives, however, are not fertile of pollen, yet one must try them to be sure. Fred Crandall of Washington has some notable seedlings from Ormohr x Great Lakes and a few more from Purissima x Capitola—a cross that has been made again and again. The cross that produced Frances Craig is the same that gave Flurry Mohr—two quite different iris, so one never expects the same things from the same cross. Seedlings derived from Iris hoogiana very often have fertile pollen and nearly all will set some seed. Hoogie Boy has been an easy pollen parent, and I am bringing out Blue Fairy as its first named seedling. The hoogiana derivatives almost invariably are blessed with vigor and great increase, and they are usually quite disease resistant.

DWARF BEARDED IRIS

A new race of dwarfs are coming to the fore through the efforts of Walter Welch and the Dwarf Iris Club in America. The various species from over the world have been put to use in hybridizing programs and new color combinations, size, form and substance are coming into being. Even the blood of tall bearded iris is being introduced and then the resulting "intermediates" are crossed back to dwarfs (Pumila hybrids), giving true dwarf plants with qualities found only in tall bearded flowers. The surface has just been scratched so we know much will be accomplished in the years to come. It is most interesting to see these dwarf-like intermediates of Cooks—the blue of Fairy Flax and the Green of Green Spot. They, too, will be much used in breeding both to tall bearded and dwarfs.

IRIS SEED

Tall Bearded Seed in various color classes.....	10c each
Tall Bearded Seed from new Pinks and Oranges.....	15c each
Dwarf Iris Seed, various colors.....	15c each
Spuria Iris Seed, various colors.....	10c each

No less than 20 seeds from any given cross due to the work involved in making the crosses and labeling the envelopes.

Kindly order seeds on separate sheet of paper or order blank for they will be sent in September.

PEDIGREED SEEDLINGS

Selected seedlings in all colors, some under number, with pedigrees.....	\$1.00 each
Pinks, Salmons, Peach, Oranges and their bi-products, involving Pink Formal, Salmon Shell, Apricot Glory, Party Dress, 49-11 C, and other fine new seedlings.....	\$3.00 each

Seedlings will be sold during the T.B. shipping season only—no spring shipments.

JOIN THE AMERICAN IRIS SOCIETY AND THE IRIS SOCIETY OF GREAT BRITAIN

Four quarterly bulletins of the American Iris Society will keep you up-to-the-minute on the latest in IRIS news and varieties. Yearly membership \$4.00. Family membership (husband and wife) \$5.00. 3 years' membership \$10.00.

Membership in the Iris Society of Great Britain \$3.00. The year book is a must.

Send memberships for either society to:

The American Iris Society, Franklin Road, Nashville, Tenn., or send a check payable to The American Iris Society and include it with your order for plants and I will forward same for you.

To anyone not already a member of either of the iris societies I will offer a pink seedling (or any other color) if the membership is included with an order for iris. Just send your check made out to The American Iris Society and request the seedling on the order sheet, making a choice of a color preference.

Come to Utah for the 1954 American Iris Society Convention

Hundreds of guest iris have come to Utah for the 1954 meeting (details of which will appear in the American Iris Society bulletins) and we are expecting several hundred more guests to come to Utah for this meeting. A show bed (in fact two of them) at the Fisher Harris home, 1422 Military Way, Salt Lake City, Utah, will hold guests from all parts of the world—all growing under similar conditions and easily accessible for viewing and comparison. We urge hybridizers who feel they have outstanding seedlings to contact Mr. Harris for space where these may be enjoyed by the visiting iris lover and judges in 1954. After the meeting all plants will be returned or disposed of as per instructions of the hybridizer. I will have room for approximately 200 more guests for this meeting, also, and some of the other American Iris Society judges and growers in this area would also make room for guests. If you have something outstanding, having it in two or more gardens would insure its being seen, or to be in bloom at the time of the meeting. Double rhizomes (left attached) would be best to send this year since single plants might not bloom for the meeting—having only one season to establish.

TERMS OF SALE

Cash with order. Postage paid on orders for \$5.00 or more, orders for less add 25c to help defray packing and postage.

SHIPPING DATES

We will start shipping the last week in June and will continue shipments up to October 1st. Please do not ask for earlier or later shipments. We have a certain amount of work to do for ourselves, too, and it is difficult to accomplish this if orders continue to come late in the season. We will try to ship at any specified date (within the shipping season) for your convenience, but since the bulk of our customers request July 15th to 30th shipping, please allow us some leeway, if possible. We try to be prompt, courteous and generous. Orders will be acknowledged with approximate shipping date given.

We are rather rushed at shipping time. If you should write a note please do so on separate sheets from your order blank. List all varieties wanted, and those you would like to have as extras on the order sheet, for if scattered through a letter one may easily be omitted.

DISCOUNTS — EXTRAS

On orders for \$20.00 or more a discount of 25% is allowed except on items marked "Net". Give us a list of Wants and Alternates so we may be generous, and with varieties we are assured you would like. Do not hesitate to list some of the newer introductions, and the larger the order the more "extras" you should list and may expect.

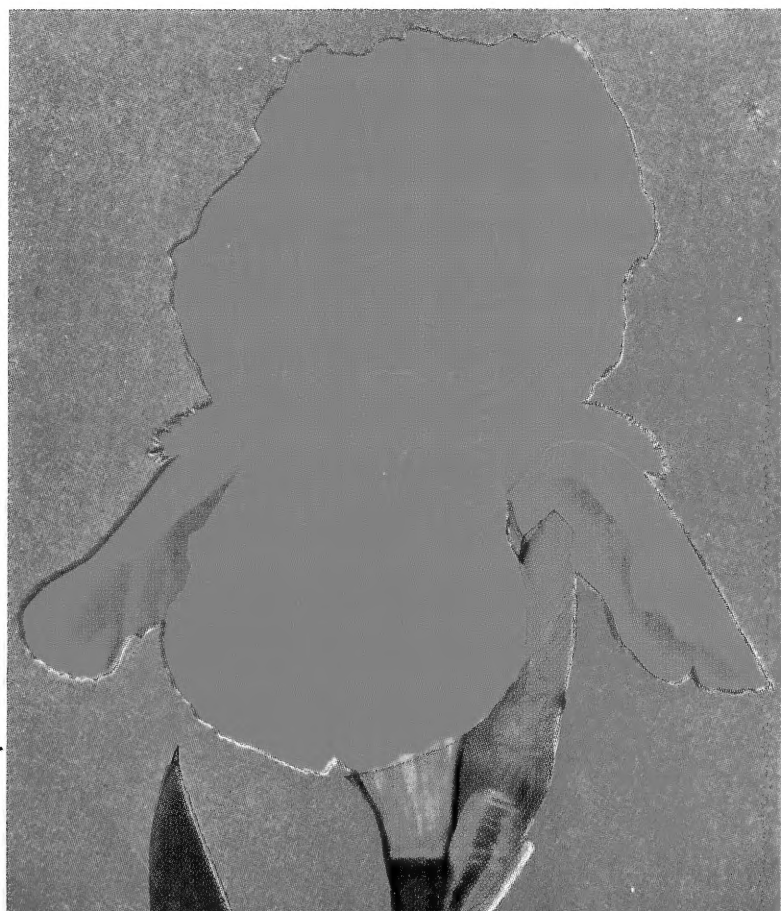

OUR CATALOG

Due to the cost of printing a catalog of this type we are making a charge of 25c to those who have not sent an order within the last three years. The charge for the catalog is deductible from your first order.
